

To Whom It May Concern,

We worked with Global EMC Inc., a Toronto based compliance testing firm that supports both our product safety and EMC compliance requirements for many years. As a long time supplier (160 + years) of standards weights and laboratory equipment to demanding test houses and laboratories who rely upon our continuing high standards, we turn to Global EMC to support our high compliance testing requirements..

The Global engineers are always well informed on potential issues and are very responsive to any questions or to provide remedies for any issues that may arise during their testing.

As a company selling high quality Laboratory Equipment to clients who turn to Troemner to rely on our products, we turn to Global EMC to meet our high expectations. They continue to impress us with their knowledge and experience when called upon and they strive to stay current with emerging standards or issues at all times.

From time to time, we request tight deadlines from Global to meet product launches or client requirements and they always are ready to accommodate our demands with a “can do” attitude.

The Troemner engineers have dealt with Global EMC for more than 6 years and look forward to working with their team for many years to come.

Yours truly,
Troemner LLC

Mike Manera,
Engineering Manager
